ABOUT THE HEALTHCARE & LIFE SCIENCES 50

The annual Irish America Healthcare & Life Sciences 50 list recognizes the excellence, performance, and extraordinary contributions of Irish-American leaders in fields including medical care, pharmaceuticals, biotechnology, medical devices, research and development, and life sciences venture capital.

ABOUT IRISH AMERICA MAGAZINE

Since its inception in October 1985, Irish America has become a powerful vehicle for expression on a range of political, economic, social, and cultural themes that are of paramount importance to the Irish in the United States. It has helped re-establish the Irish ethnic identity in the U.S. (34.7 million according to the last U.S. census) and highlights the best political and business leaders, organizations, artists, writers and community figures among the Irish in America.

ABOUT ICON PLC

ICON plc is a global provider of drug development solutions and services to the pharmaceutical, biotechnology and medical device industries and is one of Ireland's most successful indigenous companies. The company specializes in the strategic development, management, and analysis of programs that support clinical development – from compound selection to Phase I-IV clinical studies. ICON currently employs over 12,300 employees in 38 countries worldwide.

2016 KEYNOTE SPEAKER Barbara Murphy, M.D.

One of only three women to be appointed Chair of Medicine at a top medical school, and the only female Chair of Medicine in New York, Dr. Barbara Murphy is the Chair of the Department of Medicine for the Mount Sinai Health System, the Murray M. Rosenberg Professor of Medicine, and Dean of Clinical Integration and Population Management at the Icahn School of Medicine at Mount Sinai.

Born in Ireland, Dr. Murphy earned her M.B. B.A.O. B.Ch. from The Royal College of Surgeons in Ireland and went on to do an internship, residency, and a fellowship in clinical nephrology at Beaumont Hospital in Dublin. She completed her post-doctoral training with a fellowship in nephrology and transplant immunology at Brigham and Women's Hospital, Harvard Medical School. Only five years out from her fellowship she was made Chief of the Division of Nephrology at Mount Sinai. She has held many leadership positions at a national level in the American Society of Transplantation and the American Society of Nephrology, where she works to directly impact patient care and access to healthcare. Most recently, Dr. Murphy served as the President of the American Society of Transplantation. In 2011, the American Kidney Fund named Dr. Murphy "Nephrologist of the Year."

Her research focuses on the use of cutting-edge technologies in genomics and genetics to predict and diagnose outcomes of renal transplantation. Her most recent publication identifies a panel of genes that can predict whether a kidney will develop fibrosis and organ failure, leading to the possibility of early intervention to interrupt that process. In addition, she was a co-investigator on a landmark study investigating outcomes in HIV-positive patients that receive solid organ transplants.
